

Q.
Cont

¹⁰¹⁰
-- ~~49~~. The method of Claim ~~47~~⁴⁸, wherein said alkaloid comprises ethoxydihydrosanguinarine. --

¹¹¹¹
-- ~~50~~. The method of Claim ~~47~~⁴⁸, wherein said biologically-active agent comprises tetracycline base. --

¹²
-- ~~51~~. The method of Claim ~~47~~⁵, wherein said biologically-active agent comprises tetracycline hydrochloride. --

¹⁶
-- ~~52~~. The method of Claim ~~47~~⁵⁵, wherein said implant is formed in a periodontal pocket in said body. --

¹⁷
-- ~~53~~. The method of Claim ~~52~~⁶⁶, wherein said biologically-active agent is selected from the group consisting of benzophenanthridine alkaloid and tetracycline. --

REMARKS

Reconsideration of the restriction requirement is requested. Claims 1 through 53 are now in this application. Claims 46 through 53 have been added.

Claims 46 through 53 are believed to be includable into Group 1 as set forth in Examiner's request for restriction and do not constitute new matter. The antecedent basis for Claim 47 is provided at page 17, lines 6 and 7 of the specification. The antecedent basis for Claim 48 is found at page 23, Example 1 of the specification. The subject matter of Claim 49 is found at page 29, Example 2 of the specification. The antecedent basis for Claim 50 is found at page 28, Example 8 of the specification. The antecedent basis for Claim 51 is found at page 29, Example 9
